COOLING AND DISPENSING SYSTEMS

STAINLESS STEEL & OAK WOOD

The result of this combination is a unique look, which you will appreciate in a rustic kitchen, home bar or smaller commercial environments.

SOUDEK 50 NEW

SOUDEK 50 NEW GREEN LINE

The luxurious beer cooler SOUDEK 50 NEW GREEN LINE with 2 taps represents combination of exclusive oak wood and stainless steel accessories. The result of this combination is a unique look, which you will appreciate in a rustic kitchen, home bar or smaller commercial environments, such as wine shops or wine bars. Technically, this model is based on our beer cooler KONTAKT 40.

<< TEMPERATURE CONTROL

The standard supplied part is a thermostat enabling continuous and precise regulation of the beverage temperature.

< EASY TO CARRY

Easy and safe handling thanks to the small dimensions of this dispensing machine and wooden handle, which is located on its upper part.

| BENEFITS AND USEFUL FEATURES

INNOVATION - All our luxury coolers are constantly evolving and meet all the latest safety standards and certifications (Czech and European).

DESIGN - Solid oak wood in combination with stainless steel accessories gives those coolers an unmistakable look.

STAINLESS STEEL TAP - We offer a choice with a stainless steel tap for bottling wine, which is optimal both in terms of durability and hygiene.

PERFORMANCE - The SOUDEK series dispensing machines, with their increased continuous output 40-50 l/h, enable the continuous serving of 80-100 high-quality chilled beverages in quantities corresponding to their numerical designation in liters.

GREEN LINE - LINDR GREEN LINE technology is environmentally friendly thanks to the use of ecological refrigerant R-290. Thanks to this design, each of the products achieves 20% higher energy efficiency and 20 % lower electricity consumption. We produce energy system savings during its production.

COOLING SPEED - The unique design of the cooling block with a perfectly tuned circuit guarantees not only the cooling of the beverage within a few minutes of switching on, but also the maintenance of a constant temperature if several beverages are dispensed in a short time.

BEVERAGE VOLUME IN THE COOLING UNIT - A characteristic feature of our coolers is the large volume of beverage in the cooling block. Even the smallest models in the range of luxury coolers have a minimum of 0.5 l. The uniform inner diameter of the cooling coil (7 mm) from the dispense head to the tap guarantees cleanliness and optimal flow of the beverage.

EQUIPMENT - The standard supplied part is a thermostat enabling continuous and precise regulation of the beverage temperature, a tap, a tap wrench, a drip tray and speedfit fittings for easy connection.

OVERALL COMPACTNESS - SOUDEK portable coolers have the best ratio of performance, size and price on the market.

WE KNOW THAT DETAILS MATTER
