## MOBILITY & DESIGN

The CWP NEW GREEN LINE Mobile models feature a tap stand with plaques, a backlit advertising panel and a built-in drip tray. The cooler has a stable base and sturdy wheels that allow easier transportation.

# CWP 300 MOBILE NEW 2X TAPS **GREEN LINE**

The mobile cooler from the CWP NEW GREEN LINE is a perfect to use for events, trade fairs or sporting events thanks to its mobility, a tap stand with advertising plaque and a work surface with a drip plate. It is a professional device combining the advantages of contact and water coolers by using direct evaporator energy to cool the beverage line, offering constant performance without the use of an ice bank. Thanks to these features, the device can be cooled down quickly while maintaining a constant temperature at increased flow rates. We pride ourselves on quality workmanship and perfect design, but also on high performance with compact dimensions.

## ^ DRAIN VALVE WITH WATERMARK

The cooler is equipped with a drain valve that allows easy draining of water from the unit and a watermark to see the liquid level.

## << THERMAL REGULATION

Thermostat for smooth and precise beverage temperature control is a standard part.

## | BENEFITS AND USEFUL FEATURES

**INNOVATION** – All our coolers undergo continuous development and meet all the latest safety standards and certifications (Czech and European).

**CWP TECHNOLOGY** – CWP stands for Contact Water Power. It is a unique thermoblock design, developed by our company, that combines the advantages of dry contact and water coolers.

The evaporator is in direct contact with the beverage line and can react immediately to increased beverage flow. The time needed for cooling is only about 30–40 minutes from turning on the device.

**GREEN LINE** – LINDR GREEN LINE technology is environmentally friendly thanks to the use of the environmentally friendly refrigerant R-290. Thanks to this design, each product achieves 20% higher energy efficiency and 20% lower electricity consumption. In its production we carry out systemic energy saving.

**PERFORMANCE** – CWP NEW GREEN LINE enables, thanks to the increased continuous output, the dispensing of quality chilled beverages in quantities corresponding to their numerical designation in litres. **NUMBER OF COILS** - The cooler enables dispensing up to three different beverages.

**CONSTRUCTION AND SERVICE** – The modern layout of the cooling technology guarantees easy accessibility for service and maintenance.

**ACCESSORIES** – A thermostat for smooth and precise beverage temperature control, a cooling coil and speed fittings are standard parts.

**TOTAL COMPATIBILITY** – CWP line coolers have the best performance, size and price ratio on the market.
