COOLING AND DISPENSING SYSTEMS

DESIGN & TECHNOLOGY

We used the design of the LINDR T series, but structurally modified it to make its assembly as easy as possible.

LINDR GRAND T DISPENSE TOWERS

NUMBER OF TAPS 3 - 5

Lindr Grand dispense towers dominate the place where they are installed. They have three or five taps, all stainless steel, high-quality construction without welds and a wide range of modification options just like our other towers. The construction of the tower offers a basic diameter of 8 mm for beverage management in a stainless steel design with the possibility of change to 10 mm. Recirculation right up to the taps is done thanks to the unique construction of the tower with a well-insulated cooling coil for each tap separately. For these purposes, a special recirculation connection set is supplied with the stand.

^ PRESENTATION OPTIONS

The models have an area for placing a wooden medallion or 3 backlit medallions with their own logo or beer brand. Medallions can also be placed on the tower.

< DESIGN ACCESSORIES

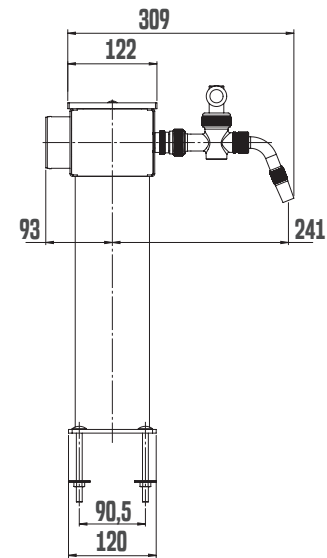

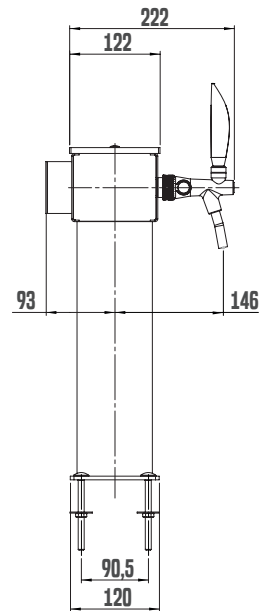

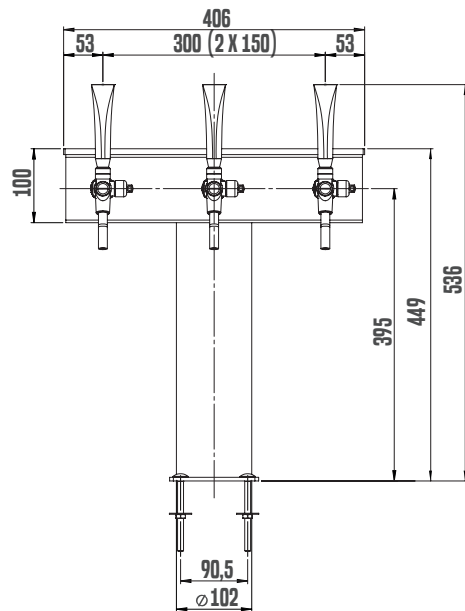

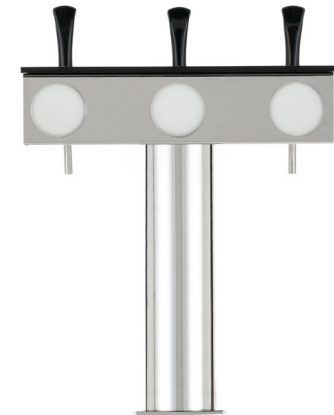

We offer the tower in countless variations with various surfaces (sandblasting, gloss) and materials (oak, polished hardened plastic), including tap handles.
